David Tran

davidttemail@gmail.com | (720) 879 - 1709 | GitHub.com/DavidTTran | LinkedIn.com/in/DTT

A long tenuous journey eventually led me to software development. In that time, I've learned that I excel in careers where I'm challenged, both mentally and physically. Where I have the opportunities for growth, and I'm able to work with like minded people and share my knowledge.

EDUCATION

Turing School of Software and Design, *Backend Developer*   01/2020 – present
                                                                      Denver, CO
- The fundamentals of OOP
- Worked both independently and collaboratively on projects.
- Bettering myself and the field as a developer

SKILLS

Backend
Ruby, Ruby on Rails, PostgreSQL, ActiveRecord, TDD, OOP, Git

PROFESSIONAL EXPERIENCE

Pugs, *Independent Contractor*   07/2017 – 11/2019
                                            Castle Rock, CO
- Hand built and installed the interiors of work vans, as well as delivered them across the country to representives.

English Teacher   08/2017 – 01/2018
                             Beihai, CN
- I worked in China as an English teacher - to both kids and adults of varying skill levels. I primarily learned about patience, flexibility, and modifying my curriculum to suit the needs of others.

Master Magnetics, *Welder*   04/2016 – 06/2017
                                        Castle Rock, CO
- I worked independently while meeting high quality standards and deadlines.

PROJECTS

Knead Recipes,   05/2020 – 06/2020
A reverse cookbook, given ingredients, returns recipes from an API ⧉
- Consumption of an API
- Bootstrap
- OOP/SOA

Rails Engine,   05/2020
A solo project - building and exposing an API and formatting responses ⧉
- Separate backend and frontend architecture.

Monster Shop,   04/2020
An e-commerce application that allowed users to log in and checkout ⧉
- RESTful Development
- Deployment to Heroku
- TDD

Battleships,   02/2020
First paired project recreating Battleships with only Ruby and a CLI ⧉
- Focused on the Fundamentals of Ruby and OOP
